Do’s and don'ts when submitting manuscripts

Prof Michael S. Hedrick
Department of Biological Sciences
California State University, East Bay

Professor Michael Hedrick is a precious friend of our section and a recently appointed editor-in-chief of Comparative Biochemistry and Physiology A. He will give a short informal presentation on the editorial process, selection of reviewers and difficult editorial decisions. He will also give advice for authors to deal with critical reviews and other advice when submitting manuscripts. The ensuing discussion is primarily directed towards graduate students, but should form the basis for interesting debate of important issues in contemporary scientific publishing. There are concrete plans of a literal continuation of the symposium in the harbor-area immediately upon conclusion of the lecture.

Friday June 24th at 14.15
Room 127 (zoofys kaffestue), building 1131
